

Build your own Guinea Pig Cage

Step by step construction plans for a small animal cage, detailed and easy to follow. Including a free Service Hotline per e-mail for questions / requests / suggestions to the plans. The small animal cage (I have called it guinea pig cage, but it is also useful for other animals like mice, hamsters, rats) has been designed by myself and is basing on a modular construction system. Presented is a cage in block form, with a removable cover, a partially glazed front wall, a floor with removable ladder, a balcony, a small house and a plastic slide. The basic dimensions of the cage are: - Length: 1100 mm - Width / Depth: 700 mm - Height: 600 mm The cage is changeable in length, height and width. It is of course also possible to determine the size and number of floors. For cleaning the pane and the cover can be easily removed. The construction manual (60 pages) consists of 15 pages of detailed instructions, 32 hand-drawn sketches and 18 digital pictures to enable easy-to-follow construction.
