

Manual of the Trees of North America (volume One)

From the back of the book: the greatest dendrologist American has ever produced was without a doubt Charles Sprague Sargent, Professor of Arboriculture at Harvard and Director of the Arnold Arboretum in Boston until his death in 1927. His monumental Manual of Trees in North America, incorporating the results of 44 years of original research, is still unsurpassed as the most comprehensive and reliable volume on the subject. ..it includes 185 genera and 717 species of trees (and many shrubs) found in the United States, Canada, and Alaska. 783 Sharp, clear line drawings illustrate leaves, flowers, and fruit.
