

## Green Technology Strategies

Green Technology Strategies is about how to use computers and telecommunications in a way which maximises positive environmental benefit, with minimum energy and materials use. The book is designed to be used with an online course for professionals, using mentored and collaborative learning techniques. Courses are offered in the Computer Professional Education Program of the Australian Computer Society (ACS), postgraduate program of Open Universities Australia and the Graduate Studies Select program of the Australian National University (ANU). Learn how to:- Estimate the carbon footprint of the ICT operations of an organisation,- Assess ways to reduce the carbon footprint of an organisation, by changes to policies for procurement of ICT, changes to the ICT operations and revising business processes.
