

# Analog Electronics: Circuits, Systems and Signal Processing

The content has been carefully designed to meet the requirements of first and second year students of electronic engineering, communications engineering and telecommunications, following full honours degree programs or two-year courses including HNC/HND. A companion website includes interactive spreadsheets to download.

\*A completely new analog electronics textbook for the digital age\* Coverage ideal for courses with a communications / wireless focus\* Companion website provides interactive spreadsheets, where readers can put the books theory into practice
