

Short-Range Wireless Communication: Fundamentals of RF System Design and Application (Demystified)

Alan Bensky is an electronics engineering graduate of Union College in New York. He earned his masters degree from the Technion in Haifa, Israel. He has spent several years developing short-range radio equipment for security systems and other uses. He is currently an independent contractor specializing in wireless development projects and he also advises companies on design tasks and issues involving U. S. and European communication standards.
