

Selling Sucks, Communicate Your Way to Triple Your Profits

Consider this; if you were sitting in front of five people and all of them spoke a different language, and only one of them spoke your language, would you be surprised if you could only communicate with that one person? Of course not, you would think it be foolish to communicate properly with the other four people if you couldnt speak their language. But yet, we sit in front of people everyday of our lives and try to talk to them, sell them, deal with them, and yes, communicate with them. The silly thing is, we think just because they speak our physical language, they should understand what we are saying. This is simply crazy of us to consider. There are many personality types, many different ways in which we were raised, therefore, we are all mentally wired differently and respond differently, and frankly, we accept information in different ways. Certain personality types are frankly horrified, irritated, and downright confused by other personality types that dont line up with theirs. So, why are we surprised that we can generally only sell people that are our personality types, and we cannot communicate with the others; thus leaving us with a terrible closing percentage? Once I raise your awareness to this vital fact, you will be off and running in the new world of COMMUNICATION. My system is guaranteed to work. I have proven my techniques all across this country. I have many, many testimonials of professional communicators that have double, tripled, and even quadrupled their income with my techniques of COMMUNICATION. Your sales days are over.
