

Review of Foreign Developments: Proposed Changes in Techniques of U.K. Monetary Policy

The Review of Foreign Developments (RFD) series begins in 1945 and ends in 1975. Starting in August 1971, papers in the RFD series also appear in the International Finance Discussion Paper (IFDP) series. These topics are focused on, though by no means limited to, international macroeconomics, international trade, global finance, financial institutions, and markets, as well as international capital flows. The analyses and conclusions set forth in the RFD series are those of the authors and do not indicate concurrence by other members of the research staff or the Board of Governors.
