

Megatrends 2010: The Rise of Conscious Capitalism

Megatrends 2010 launched the global phenomenon of Conscious Capitalism by describing the seven trends that comprise Conscious Capitalism: 1. The Power of Spirituality. Led by CEOs, spirituality is coming to organizations. 2. The Dawn of Conscious Capitalism: Top companies succeed by honoring all stakeholders, not just shareholders. 3. Leading from the Middle. Business now recognizes that ordinary managers are the secret to sustainable success. 4. Spirituality in Business. People are no longer willing to check their deeply-held values at the office door. 5. The Values-driven Consumer. Conscious shoppers are a multi-billion dollar market. How does a business reach them? 6. The Wave of Conscious Solutions. Coming to a firm near you: meditation, yoga, Heart Math, Forgiveness Training and their surprising economic benefits. 7. The Socially Responsible Investing Boom. As investors grow more skeptical of traditional funds, many are flocking to greener investment options. Once in a great while, a book challenges conventional wisdom and opens the floodgates to the future. Megatrends 2010s focus on both meaning and the bottom line celebrates the demise of Business As Usual and the birth of Conscious Capitalism.
