

# The Dynamics of Work

The success that students will experience in the future is directly tied to the topics covered and skills developed while studying *The Dynamics of Work*. Students with strong academic skills and/or job-specific skills will have an advantage in their future careers. However, without career planning skills, without the ability to solve problems, make decisions, and manage their own resources, and without an understanding of their role in business, labor, and government, students will have a difficult time reaching their potential.
