

## Opportunity Cost (MBA Buster)

Should you drive 5 extra miles to save 10 cents per gallon on gas? Which will cost you more money--buying or leasing a car? This book shows you how to use the Opportunity Cost concept to figure out these and other brain-busters! --- This book is part of the MBA Buster series. Whether you're getting your MBA from a university or have decided to go it alone, the MBA Buster series will: break a concept down into layman's terms, explain what you need to know for a test, and demonstrate how to apply the concept to the real world. --- Brevitext books aren't like normal textbooks. Not in the slightest. Normal textbooks are written by tenured university professors who have long forgotten how to relate to new students. Quantity, not quality, is the name of the game, and after spending hundreds of dollars on thousands of pages of awkwardly-written material, readers find themselves overwhelmed and confused. Brevitext books, on the other hand, are written by fellow students who have recently mastered the concepts and are now applying them to the real world. They are concise, easy-to-understand, and light-hearted. Oh, and they only cost a few bucks. For more information, visit [www.brevitext.com](http://www.brevitext.com).
