

# Energy Budgets at Risk (EBaR): A Risk Management Approach to Energy Purchase and Efficiency Choices

Energy Budgets at Risk (EBaR) provides everyone from facility energy managers and financial managers to government policy-makers and electric utilities program planners with the background information required to understand energy cost, price, efficiency, and related issues important in developing a balanced approach to facility energy risk management. Throughout the book, respected energy economist Dr. Jerry Jackson clearly shows how to reduce energy costs and increase cash flows by using risk management concepts developed in the financial industry.
