

## French Artillery and the Gribeauval System: Volume 1: 1786-1815 (Officers and Soldiers of)

This work presents in detail the uniforms of the foot artillery between 1786 and 1815. Formal in style, and indeed austere, the uniforms illustrated here were the very ones worn by those who participated in during the most crucial and of the Empire. (71 plates including 29 by Ludovic Letrun) An important part of the book is devoted to the detailed description of equipment (artillery, ammunitions, front axle units, forges, etc.). Developed and used by the gunners ever since the reforms of Mr. Gribeauval, his construction tables provide a clear presentation of primary artillery as well as the basic tactics employed by the Army.
