Demand & Supply Graph Template (Other) Creately Put the quantity of the good you are asked to analyze on the horizontal axis and its price on the vertical axis. Draw a downward-sloping line for demand and an upward-sloping line for supply. The initial equilibrium price is determined by the intersection of the two curves. Label the equilibrium solution.

Demand and Supply Principles of Macroeconomics ECO 201 The price and quantity of goods and services in the marketplace are largely determined by (a) consumer demand and (b) the amount that suppliers are willing to supply. Demand and supply can be graphed as curves and the two curves meet at the equilibrium price and quantity.
