

## Modern Radio (Classic Reprint)

The Studio Thirty million families listen to radio programs every day, but few people listening in have any idea how modern radio stations, networks, and receivers operate. Even people who visit broadcasting studios usually come away more mystified than they were before. It is true that radio is a complicated science and a science that is constantly developing and changing. It is also true that some of the scientific problems involved cannot be fully explained even by scientists. But much of the mystery of radio can be cleared up if each operation, from the original broadcast to its reception in your home, is explained separately. Starting with the studio where the program originates, we shall follow the program to the control room, to master control, then out along the telephone lines to the transmitter, to the transmitting antenna or radiator, to your receiving antenna, through your radio set to the loud-speaker in your home. Radio has made tremendous strides in the last few yea

Table of Contents
