

Price Stabilization in the 1990s: Domestic and International Policy Requirements

This book investigates various aspects of inflation - the recent history of inflation as well as potential sources of the observed changes of inflation, the technical issues regarding the measurement of inflation the indicators for future inflation, and the policy implications to achieve and maintain price stability. It contains papers and comments presented at a conference held in October 1991, including contributions from Allan H. Meltzer and Stanley Fischer and an overview by John B. Taylor.
