

Prosperity Training

Prosperity Training is an holistic mind training method, aimed at developing mental states enabling us to achieve objectives, successes and self-realisation. This differentiates it positively from commonly accessible methods, which usually take one or two factors into account. Fragmentariness is sometimes efficient, if it delivers us the missing pieces, whereas statistically it is inefficient. That is why Prosperity Training is made up of more than a dozen topic blocs, which can also be treated as separate training methods. Basic meaning bundles of the training: Objective steering this training part teaches how to correctly and efficiently formulate objectives, what kinds of objectives may be differentiated. Shaping subjective terms which enable us to achieve objectives because a properly formulated objective may be insufficient to achieve our dreams, this training part is talking about what eligibility criteria must be met or what inner qualities we must develop to achieve the objectives. Work with wishes and freeing energy properly formulated dreams are what drive our successes. This training part teaches how to work with wishes and how to free the energy necessary to act. Creating the space of happiness, success and joy what else does the achievement of our dreams depend on and how does the world we live in and the people we meet influence our objective achievement? The Tree of Mind this part of the training teaches how to use mind powers to make the mind our ally on the path of self-realisation. Work with the driving force and the law of cause and result so what is really responsible for the success, how to look for your freedom margin and what makes improvement possible. The training of openness and crossing limits work with the states of lack and want; freeing ourselves from improper beliefs. Work with symbol of Wealth it allows for process activation to support

objective achievement. 9. Value Training what is really motivating us to action and what makes our lives meaningful. Work with the Initial Situation and motivation. Working with dreams. The training was created by Navis Nord in the years 1992-2006. It was first presented in its entirety in 2007 at Station Nord, Cracow. Since then it has been systematically taught and enriched with new threads and more detailed explanations. This book presents the training to a wider audience for the first time. The material fragments presented here were taught at Station Nord Cracow in the years 2014-2015. The Prosperity Training book may be of much use for managers, people aiming for success and people who would like to achieve their objectives. It is based on over three decades of author experience: the experience of a coach, consultant and an advisor. But it also opens broad horizons, discussing many issues from a philosophical point of view so it will not turn anyone into a moneygrubber. The content and tools presented here allow you to keep your feet on the ground. However, the book does not make us grounded and does not turn us into people only interested in money and consumption, because it also takes into account the mystical point of view.
