

Uneven Zimbabwe: A Study of Finance, Development and Underdevelopment

This book explains development, underdevelopment, economic crisis, structural adjustment, and class formation in one of the most unequal societies in the world. Intensified uneven development in Zimbabwe is mainly due to the periodic rise of financial capital, which has occurred, historically, in the 1890s, 1920s, 1950s, and the late 1980s - early 1990s with effects evident across urban and rural space and geographical scale.
