

Interview and Business Success Strategies

Congratulations! You have made the first step in becoming a more successful person in your line of business by craving change and by researching the tools to help you do so. Desiring a change in any situation is a big first step, and education is another step to complement your first step. In my book, I am going to impart years of first-hand experiences, knowledge, trial and error, and research to you. You will benefit from the information contained in my book on the following strategies: resume tips and interview tips in three phases from prior to the interview, during the interview and the post-interview. I will also summarize some interviewing formats, paying special attention to the STAR behavioral interview technique and what you should expect from this type of situation. I will cover some security tips at work and review some lessons on gaining and asserting your confidence in the business world. I will also cover general information as it applies not only to the workforce, but also to your personal life and personal success as well. The objective of my book is to help you to develop into a happier, satisfied, more successful individual with the time that you spend in the workforce. Whether your goal is to make more money or to gain a specific title, or both, the principles in this book may benefit you at different career levels. Each individual has a different set of goals and needs, and no two people are the same. People can find success within themselves and be satisfied in different aspects of their lives. Enjoy the journey with me as we continue. Sincerely and kind regards, Melanie Calverley
