

Classroom-To-Go Training Course 2: Managing Devices and Implementing Disaster Recovery [Windows Server 2003 Edition]

Written by the premier author in Windows administration, William Stanek, and addressing the needs of Windows 2003 administrators and support staff, Classroom-To-Go Training Course for Managing Users, Computers, and Groups is designed to help you build your knowledge of Windows Server 2003. In this course you'll learn how to: Manage and maintain physical and logical devices Install and configure server hardware devices Troubleshoot hardware devices Understand disk partition styles Use basic and dynamic disks Configure disks using disk management and diskpart Manage and maintain striped, mirrored and striped-with-parity volumes Maintain disks Manage and implement disaster recovery Manage backup procedures Restore data from shadow copy volumes Recover from operating-system failure. Classroom-To-Go training courses are designed for: Those who want to complete their Microsoft Certification Those who want to learn about new technologies Those who want to refresh their memories about technologies they've previously learned. This audiobook provides a unique way to study new technologies and to recall details about technologies you may have formerly mastered.
