

The Truth about Money

When you look at almost everything we do, it concerns money. This book will explain in the simplest terms the money problems we have today and find some solutions. The truth about Money ideas will help you or your business succeed. Today, changes are required to help you and the country where critical thinking is necessary to succeed. Current budgeting requirements require everyone to reduce the common good to maintain a balanced budget. This is absolutely ridiculous. Questions are being brought up how to limit the governments debt. The static budget systems for government, states, cities and municipalities are extremely limiting and antiquated and need to be changed. The handling of money was given to the Federal Reserve, a private organization, in 1913 by Congress. New money is created only by issuing debt to private institutions and to the government. The Constitution states that only Congress shall coin and regulate money. The soaring national debt could be reduced by not paying interest to the bankers of the Federal Reserve System, who print paper money and then loan it to the government at interest. There are so many things that need fixing. Im sure you could s list. Why dont the Government use the treasury to print money to eliminate debt, and correct everything that needs fixing or replacing? How many jobs would that create?
