

The Turnaround

Authored by Ron Lowy, CEO & Managing Director of the RAL Group, LLC. The leadership of a company changes for a variety of reasons. Some change as part of a planned, logical transition from a strong, effective leader whose time has come to retire. Some change as result of acquisition or divesture. Some change because the business has grown beyond the recognized skills of the management team. However, most leadership changes because the direction of the company is not where the Board of Directors or governing body believes it should be. Thus we are looking at the Turnaround. As with many specialties in business (as there are with many areas of life) you begin developing particular skills and expertise through circumstances that you find yourself in from time to time. As time goes, you tend to seek out those situations that allow you to excel with those skills you've acquired. And then finally, you become known for particular skills and expertise and people seek you out. In my thirty-five years of business experience I've been involved with or have lead upwards of twenty different turnaround situations. Early on in my career, these situations were small, contained units suffering from under-performance. As time went on and my experience grew, they became larger and larger until they involved large multi-million to billion dollar business units and finally companies of all shapes and sizes from 75-year-old firms to technology startups. Although each of the business turnarounds I've been involved with had its own unique issues, circumstances and situations, as time has progressed, a simple set of five concepts has become part of my modus operandi. First of all, focus. A company without focus is a ship without a rudder. Second, move fast. Time is never on your side speed is paramount. Third, customer first. Whether it is a product or service, the customer is

the ultimate decider of the success of your endeavor. Fourth, flexibility. Nimble, ability to adjust to changing situations, a pragmatic approach to plans, processes, policies and people. Fifth, have some fun. Turnaround situations require some difficult decisions in many areas. This can sometimes lead to very stressful circumstances. Appropriate humor and some fun can help to relieve some of the stress making the team think clearer and work better together. Following these five concepts won't solve all the problems in your business. However, it will provide a framework and systematic approach, which will help to drive your organization forward and upwards. In the rest of this paper, I've tried to describe the approaches and processes that I've found most effective in addressing each of the five concepts. I'll also try to give you some of the common issues that are experienced when implementing this process, some thoughts about why those issues surface and some ideas as to how to resolve or avoid them altogether.
