Interviews. For some, they're prime opportunities to socialize and discuss mutual career interests. For others, they're the source of sleepless nights, sweaty palms, or embarrassingly shaky hands. We've all had different interview experiences from the brief conversation between two individuals to the never-ending professional interrogation yet our primary goal is the same: convince the interviewer that we're the best applicant. Doing this requires our ability to communicate our qualifications and skills in a compelling way, but it also requires our ability to take appropriate actions before and during our next interview. The successful interviewee will conduct pre-interview research, understand how to self-market their strengths, prepare themselves for the expected, unexpected, and dreaded interview questions, and know how to foster professional chemistry with their interviewer. Whether you dread the interviews' intimidating process or are barely phased by the bombardment of questions, this book will familiarize you with the ins and outs of the interview process and will shape you into the ideal applicant that stands out among their peers.
